Kelly Ann Marshall

Front-End Developer · UI Developer · Web & Visual Designer

MSc Information Technology (Merit) · BFA Photography
Glasgow, Scotland · +44 (0)7906 117 249 · kelly_ann_marshall@yahoo.com · kellyannmarshall.github.io

Profile

Front-end developer and UI specialist with extensive experience building complex web applications and interfaces using Angular, Vue, TypeScript and JavaScript. Combines strong technical development skills with a professional background in graphic and web design, bringing a distinctive blend of engineering capability, visual design expertise and user-centred thinking.

Experienced in developing interactive data visualisations, mapping applications and responsive user interfaces, working collaboratively with UX, design and engineering teams to turn complex requirements into intuitive digital experiences.

Enthusiastic adopter of emerging AI-assisted development technologies, with professional experience evaluating Anthropic Claude within an established software development workflow and independent experience using generative AI tools to accelerate application development, modernise codebases, improve testing and strengthen accessibility.

Core Skills

Front-End Development

- Angular / Vue.js
- TypeScript / JavaScript / ES6
- HTML5 / CSS3
- SASS / LESS
- RxJS / NgRx

AI-Assisted Development

- Anthropic Claude
- GitHub Copilot
- ChatGPT
- Google Gemini
- AI-assisted application development and prototyping
- Code generation, refactoring and modernisation
- Automated test generation
- Code quality and accessibility improvements

UI / UX & Design

- UI design
- Wireframing and prototyping
- User-centred design
- Figma / AdobeXD / Balsamic

Data Visualisation & Mapping

- D3.js
- MapboxGL / OpenLayers
- Interactive mapping
- Data visualisation

Development & Testing

- Python / Django / Flask
- PHP / MySQL
- Node.js
- Git
- Jest / Jasmine
- Cypress / Playwright

Infrastructure & Development Tools

- AWS
- Docker
- Terraform
- Keycloak
- Storybook
- Bitbucket
- Jira

Professional Experience

Front-End Developer

Beeks Financial Cloud Group Plc — Renfrew, Scotland
Nov 2022 – Oct 2025

Worked as part of an internal development team building a network and server infrastructure self-service portal using Angular and Python/Django.

AI-Assisted Development Evaluation

Selected as one of a small group of employees to volunteer for a company trial of Anthropic's AI assisted development technology.

- Configured Visual Studio Code to integrate with the Anthropic Claude API and evaluated its practical application within an existing software development workflow.
- Experimented with AI-assisted dependency upgrades and modernisation of legacy front-end code.
- Used Claude to rapidly develop and expand automated testing specifications and explore accessibility improvements for important UI components, including the application's main site navigation.
- Evaluated the quality, usefulness and potential productivity benefits of AI-assisted coding, providing feedback to the company to inform its decision on adopting a company-wide subscription.
- Actively advocated the potential value of the technology as a development productivity tool.

Front-End Development

- Developed front-end features for a network and server infrastructure self-service portal using Angular and Python/Django.
- Designed and developed chart components using D3.js to display server usage analytics and make infrastructure data easier to interpret.
- Maintained and modernised legacy front-end code, including upgrading dependencies and keeping the application current.
- Worked within an internal development team to deliver and maintain a complex business application.

Technologies: Angular · TypeScript · NX · NgRx · RxJS · D3.js · Jest · NgMocks · Jasmine · Storybook · Playwright · Keycloak · Docker · Bitbucket · Jira

AI Tools: Microsoft Copilot · Anthropic Claude

Senior Developer

Idox Group — Glasgow, Scotland
Aug 2020 – Jun 2022

thinkWhere was acquired by Idox in October 2021.

Worked as part of an agile development team with a strong focus on UI design and front-end development for *groundMapper*, a fully featured cloud GIS data application.

- Designed and developed user interfaces for a complex GIS application combining mapping, data management and search functionality.

- Created wireframes and UI designs for advanced search, split-screen map/data views and bespoke forestry data management features.
- Developed and delivered administration features covering permissions, accounts, projects and user management.
- Designed and developed the front end for EuroGeographics Open Maps for Europe, a website providing access to official European map, geospatial and land information.
- Worked collaboratively within an agile team across design, development and product requirements.

Technologies: Angular · TypeScript · RxJS · OpenLayers · Python · Flask · Bootstrap · Cypress · AWS · pgAdmin · Docker · Terraform · IIS · Figma · Adobe XD · Balsamiq · Git · Jira

UI Developer

VisitScotland — Edinburgh, Scotland
Aug 2018 – Feb 2020

Worked as part of an internal development team on a major re-platforming project for VisitScotland's flagship website.

- Developed front-end components and templates as part of the re-platforming of VisitScotland's main website.
- Created proof-of-concept interactive tourism destination maps with filtering and sorting across destination, product and event data.
- Developed map experiences incorporating accessibility considerations and rich filtering and sorting functionality.
- Worked with UX, design and software engineering teams to create complex itinerary CMS templates integrating destination data with interactive maps.

Technologies: HTML5 · CSS3 · SASS · Vue.js · JavaScript / ES6 · MapboxGL · Webpack · Gulp · Cypress · VS Code · BloomReach Experience CMS · Freemarker · Bitbucket · Jira

Education

MSc Information Technology — Merit

University of Glasgow — Glasgow, Scotland
Sep 2010 – Sep 2011

Focus: Java · JavaScript · PHP · MySQL · XML · HTML · CSS · Django · Python · Multimedia Systems · Software Project Management · Information Systems · Databases

Dissertation: Interactive web interface for the purchase of live event tickets, incorporating interactive venue maps built with SVG, JavaScript, PHP and MySQL.

Activities: Postgraduate Student Representative

BFA Photography

Maryland Institute, College of Art — Baltimore, Maryland
Sep 1989 – Jun 1993

Focus: Black & white and colour photography · Film and video production · Alternative photographic processes · Studio lighting · 2D design · Computer illustration · Painting · Drawing · Sculpture · Art history · History of photography
