Profile

Front-end developer and UI specialist with a strong background in both software development and visual design. Experienced in building complex web applications and interfaces using Angular, TypeScript, Vue and JavaScript, with particular strengths in UI development, data visualisation, mapping and creating intuitive user experiences.

My background in graphic and web design gives me a strong visual and user-centred perspective alongside my technical skills. I enjoy working collaboratively with UX, design and engineering teams to turn complex requirements into clear, usable interfaces, and have experience working across the full process from wireframes and prototypes through to implementation.

Core Skills

Front-End Development

- Angular
- TypeScript
- JavaScript / ES6
- Vue.js
- HTML5
- CSS3
- SASS / LESS
- RxJS
- NgRx
- Responsive Web Development

UI / UX & Design

- UI design
- Wireframing
- Prototyping
- User-centred design
- Figma
- Adobe XD
- Balsamiq

Data & Mapping

- D3.js
- MapboxGL
- OpenLayers
- Interactive maps
- Data visualisation

Development & Testing

- Python / Django / Flask
- PHP / MySQL
- Node.js
- Git
- Docker
- Jest / Jasmine
- Cypress / Playwright

Cloud & Tools

- AWS
- Terraform
- Jira
- Bitbucket
- Storybook
- Keycloak
- IIS
- pgAdmin
- Microsoft Copilot
- Anthropic Claude

Creative

- Photoshop / Illustrator / InDesign
- Photography
- Illustration
- Retouching
- Prepress
- Sound & video production

Professional Experience

Front-End Developer

Beeks Financial Cloud Group Plc — Renfrew, Scotland

Nov 2022 – Oct 2025

Worked as part of an internal development team building a self-service portal for network and server infrastructure.

Technologies:

Angular · TypeScript · NX · NgRx · RxJS · D3.js · Jest · NgMocks · Jasmine · Storybook · Playwright · Keycloak · Docker · Bitbucket · Jira · Microsoft Copilot · Anthropic Claude

- Developed front-end features for a network and server infrastructure self-service portal using Angular and Python/Django.
- Designed and developed chart components using D3.js to display server usage analytics and make infrastructure data easier to interpret.
- Maintained and modernised legacy front-end code, including upgrading dependencies and keeping the application current.
- Worked within an internal development team to deliver and maintain a complex business application.

Senior Developer

Idox Group — Glasgow, Scotland

Aug 2020 – Jun 2022

thinkWhere was acquired by Idox in October 2021.

Worked as part of an agile development team with a strong focus on UI design and front-end development for *groundMapper*, a fully featured cloud GIS data application.

Technologies:

Angular · TypeScript · RxJS · OpenLayers · Python · Flask · Bootstrap · Cypress · AWS · pgAdmin · Docker · Terraform · IIS · Figma · Adobe XD · Balsamiq · Git · Jira

- Designed and developed user interfaces for a complex GIS application combining mapping, data management and search functionality.
- Created wireframes and UI designs for advanced search, split-screen map/data views and bespoke forestry data management features.
- Developed and delivered administration features covering permissions, accounts, projects and user management.
- Designed and developed the front end for EuroGeographics Open Maps for Europe, a website providing access to official European map, geospatial and land information.
- Worked collaboratively within an agile team across design, development and product requirements.

UI Developer

VisitScotland — Edinburgh, Scotland

Aug 2018 – Feb 2020

Worked as part of an internal development team on a major re-platforming project for VisitScotland's flagship website.

Technologies:

HTML5 · CSS3 · SASS · Vue.js · JavaScript / ES6 · MapboxGL · Webpack · Gulp · Cypress · VS Code · BloomReach Experience CMS · Freemarket · Bitbucket · Jira

- Developed front-end components and templates as part of the re-platforming of VisitScotland's main website.
- Created proof-of-concept interactive tourism destination maps with filtering and sorting across destination, product and event data.
- Developed map experiences incorporating accessibility considerations and rich filtering and sorting functionality.
- Worked with UX, design and software engineering teams to create complex itinerary CMS templates integrating destination data with interactive maps.

Front-End Developer

Peninsula Business Services — Glasgow, Scotland

Aug 2017 – May 2018

Technologies:

HTML5 · CSS3 · LESS · AngularJS · JavaScript / ES6 · Node.js · Gulp · Git · Karma · Jasmine · VS Code · Jenkins · Web APIs · Microsoft Team Foundation Server

- Developed HTML, CSS/LESS and JavaScript features for an internal task-management single-page application built with AngularJS.
- Researched and implemented the Postcode Anywhere API for client address search and data entry.
- Refactored the project's CSS/LESS structure to improve maintainability.
- Introduced automated CSS code linting to improve consistency and code quality.

Front-End Developer

Arnold Clark — Glasgow, Scotland

Feb 2014 – May 2017

Technologies:

HTML5 · CSS3 · SASS · JavaScript · jQuery · Node.js · Git · Backbone · Jekyll · Joomla · Jasmine

- Worked as part of an agile web development team on the client-side development of Arnold Clark's rental and leasing websites.
- Developed responsive HTML, CSS/SASS and JavaScript features across multiple customer-facing websites.
- Worked with Worldpay technical support and the back-end developer to upgrade a legacy online payment system to Worldpay Hosted Payment Pages.
- The new payment implementation was responsive across tablet and mobile devices and contributed to a **21% increase in mobile revenue**.

Web Content Officer

University of Glasgow — Glasgow, Scotland

Oct 2012 – Nov 2013

- Provided web design, development and support to academic and professional services staff using the T4 CMS.
- Developed a searchable pop-up video gallery using CSS and jQuery.
- Developed reusable magazine and responsive email content templates.
- Developed a customised PHP/MySQL database and web-based editor for managing research and academic URLs, cross-references and associations.
- Created training and support resources for the T4 content management system.

Web Developer / Research Assistant

University of Glasgow — Glasgow, Scotland

Oct 2011 – Nov 2012

- Designed and developed websites and web applications while contributing to project coordination, user evaluation studies, presentations and technical writing.
- Developed a customised PHP/MySQL web content editor for the School of Mathematics & Statistics and School of Computing Science.
- Designed a child-friendly search interface for patients at Emma Children's Hospital in Amsterdam.
- Designed and evaluated alternative search interfaces for an information-retrieval user study.

Earlier Design Experience

Graphic Designer

Admit One — New York, NY

Feb 2008 – Sep 2010

Print and web design, email campaigns, illustration, prepress, large-format displays, trade-show booths, corporate identity, signage and project management. Managed relationships with outside vendors and contributed to the production of weekly email campaigns reaching more than 20,000 recipients.

Graphic Designer

Henry M. Jackson Foundation for the Advancement of Military Medicine — Bethesda, MD

Nov 2002 – Nov 2007

Print and web design, annual reports, business proposals, brochures, scientific posters, trade-show displays, corporate identity, websites and promotional materials. Managed projects, worked directly with clients and vendors, and supervised summer design interns.

Selected work included:

- Corporate annual reports
- Naval Medical Research Center capabilities brochure
- Recruitment advertising featured in *Nature* magazine
- Large-format exhibition and trade-show displays, including a 10-metre multi-panel display
- Company and client websites

Earlier Career

Graphic Designer — Lado International College, Washington, DC

Feb 1999 – Dec 2000

Advertising Designer — Channing L. Bete Company, South Deerfield, MA

Jun 1996 – Jan 1999

Freelance Designer — New York, NY

May 1994 – May 1996

Digital Retoucher — Digital Stock Connection, Rockville, MD

Jun 1993 – May 1994

Studio Portrait Photographer — Elegant Images, Towson, MD

Jun 1992 – Mar 1993

Education

MSc Information Technology — Merit

University of Glasgow — Glasgow, Scotland

Sep 2010 – Sep 2011

Focus: Java · JavaScript · PHP · MySQL · XML · HTML · CSS · Django · Python · Multimedia Systems · Software Project Management · Information Systems · Databases

Dissertation: Interactive web interface for the purchase of live event tickets, incorporating interactive venue maps built with SVG, JavaScript, PHP and MySQL.

Activities: Postgraduate Student Representative

BFA Photography

Maryland Institute, College of Art — Baltimore, Maryland

Sep 1989 – Jun 1993

Focus: Black & white and colour photography · Film and video production · Alternative photographic processes · Studio lighting · 2D design · Computer illustration · Painting · Drawing · Sculpture · Art history · History of photography
